Profile

Certified data analyst (TechCrush bootcamp) with hands-on experience across Excel, Power BI, SQL (T-SQL), Python, R, and web scraping. Comfortable across the full pipeline — from building ETL processes and dimensional data models to designing dashboards that turn raw numbers into decisions people can act on. Currently a 300-level Biochemistry student at UNILAG, bringing a scientific, detail-oriented approach to data work.

Core Skills

- Python (Pandas, BeautifulSoup) — data wrangling, automation, web scraping
- T-SQL & Power BI — advanced, production-style dashboards and reporting
- Advanced Excel — pivot tables, dynamic dashboards, data modeling
- R — statistical analysis and exploratory data analysis
- ETL pipeline design & dimensional modeling
- Bash & WSL/Ubuntu — intermediate, for scripting and environment management

Applied Projects

All projects below are live and verifiable on GitHub.

Project	Stack	What it does
Public-Health-Data-Warehouse-Analytics-Pipeline-	T-SQL, Power BI	Relational data warehouse built on synthetic hospital data — SQL ETL pipeline, dimensional modeling, and Power BI dashboards for healthcare metrics.
COVID-19-Nigeria-PowerBI-Dashboard	Power BI, Excel	Interactive dashboard tracking COVID-19 case trends, testing, and recovery metrics across Nigerian states.
CodeAlpha_jumia_web scraping	Python, BeautifulSoup	Automated ETL pipeline scraping Jumia product listings — pricing and specifications for e-commerce market trend analysis.
AI-Document-Extraction-QA-Validator	Python, JSON	Programmatic verification framework running automated type-enforcement and validation checks to catch document extraction errors.
Spotify-EDA-project	Python, Pandas	Exploratory data analysis on Spotify streaming data — genre trends, popularity drivers, audio feature correlations.
Excel-Chocolate-Sales-Analysis	Advanced Excel	Pivot table and dashboard analysis of chocolate sales data — top products, markets, and order distribution.
Synthetic-Sales-Data-Dashboard	Excel	Synthetic sales dataset generation paired with a dynamic dashboard for practicing pivot tables and chart automation.

Professional Experience

Assistant Tutor & Community Manager

ULLSSA Skill Up Programme, UNILAG — May 2026 – Present

- Managing a 10-week intensive data analysis track: curriculum delivery, student progress tracking, and technical mentorship in data analytics software.

SIWES Industrial Trainee

NAFDAC — 2025

- Completed a 3-month industrial attachment; gained exposure to regulatory laboratory environments, quality assurance protocols, and operational workflows.
